

Freightliner Accessories List

Fleet Air Filters helps keep your truck running by filtering harmful debris while enjoyed improved MPG and an increase in horsepower do to a less restrictive air flow rate compared to your stock filter.

\$325.00 - Installed

Airtabs™ are patented after-market aerodynamic drag reduction add-on devices that provide users the following benefits:

Fuel Savings: 2-5% range

Safety: Vehicle stability improvement, reduced lane excursions, roll over risk and improved handling in gusty wind conditions; Improved rear view mirror visibility and safer lane changes in rain or snow.

Low Cost: Rapid ROI in commercial use.

Maintenance: No maintenance or special training required

Operational Impact: None

\$352.00 - Installed

Fass System Titanium Fuel Pump

The Titanium Series diesel fuel pump is a compact design with a very powerful motor. Manufactured to hold up to the most extreme conditions, our Titanium Series pump utilizes a motor that is capable of flow rates up to 260 gallons per hour.

In addition to improved fuel flow, FASS Titanium Series lift pumps offer advanced filtration for your diesel fuel. Removing water, air and vapor in addition to debris with a filtration rating of 3 micron, far superior over your factory fuel filter. The added filtration will help improve your engines idle and extend the life of the injectors and injection pump.

\$1,675.00 - Installed

Espar's AIRTRONIC D2 dramatically reduces engine idling used to provide heat to the sleeper and cab. This means decreased engine wear and fuel consumption. The AIRTRONIC D2 employs great advancements in heater technology to warm passenger compartments efficiently, economically and quietly.

The heater cycles through 4 heat levels to maintain the desired comfort set by the operator. The high heat mode allows for rapid cab heating while the low heat mode provides a quiet, comfortable sleeping environment.

Its compact size allows for an easy and simple installation in the tool or luggage compartment in most sleeper cabs. This system typically runs for about 21 - 23 hours on a gallon of diesel fuel and comes with a 2 year warranty.

\$1,445.00 - Installed

Pittsburgh Power Balancer

This balancer improves engine performance, durability, and reduces cab vibrations and vibration noise. Unlike ball bearing balancers mercury never wears out and is much quieter. The Pittsburgh Power Balancer reduces rotational vibration in crankshafts and wheels. Mercury filled raceway compensates for minor rotational imbalances. \$398.00 - Installed

Balance Masters® works with a patented process that is simple physics, Newton's third law that states for every action there is an equal and opposite reaction. Balance Masters® actively compensates for any out of balance condition and vibration. There are no steel balls, no sands or oils, and no pre-balancing required. The active ingredient is mercury. It is 3 1/3 heavier than steel by volume, and is all natural. It is not affected by extreme temperatures, hot or cold. There are no wear patterns to worry about with Balance Masters® because there are no frictional materials. The liquid moves smoothly to the desired area around the balancer. The balancer actively balances the wheel assembly for a smooth ride.

Balance Masters includes driver and passenger side balancers. Select the type of balancer you need below and enter in the comments section the number of axles you want to install on.

\$350.00 per axle - Installed

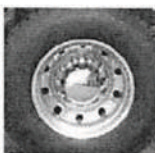

Pittsburgh Power Hi-flow Muffler

The Universal Stack Muffler offers an alternative to Pittsburgh Power Quiet Performance muffler with lower exhaust gas temperatures, up to 50 additional horsepower, fast return on investment and mileage gains.

1 Stack \$255.00 - Installed

Coronado \$575.00 - Installed

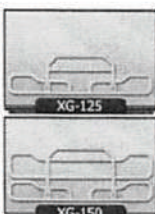

Wheel Covers package look great and help give your truck's rims a unified appearance by covering the exposed center hubs and lugs with a slick ABS Chrome plastic. The package includes both front and rear wheel covers.

\$300.00 - Installed

Add brand new chrome hood mirrors on your truck for increased visibility while you're on the road.

Select drivers side only, passenger side only or have both installed for \$300.00.

The Ex-Guard™ system provides a unique front end protection system for trucks that has the greatest strength to weight ratio in the market. Ex-Guard™, designed for Big Rigs and Semi Trucks, is ideal for fleets needing Grill Guards, Bumper Guards, Bull Bars, Roo Bars, Cow Catchers, Deer Guards, and other animal collision protection.

Select an Ex-Guard Bumper Guard for your Freightliner.

Freightliner Low Bumper Guard Installed - \$1,395.00

Freightliner High Bumper Guard Installed - \$1,670.00

We offer fenders from Hogebuilt and Trux Accessories. By adding stainless steel fenders to your truck the benefits to having these include resisting corrosion, while the chrome plating provides a uniform and very attractive finish.

Overload Protection: Automatic shutdown
Short Circuit Protection
Input Voltage Range: 10V to 15V
Low Battery Auto Shutdown: 9.5 V ± 0.5

1,415.00 - Installed

High Performance (HP) Seats: The heart of the High Performance (HP) seat is the HP air suspension, proven in testing to reduce vibration transmitted to the occupant better than seven competitors. This reduced transmissibility helps reduce strain and the down town causing fatigue it leads to. Working in tandem to maximize your comfort, the HP series seat features our exclusive BackCycler system. By cyclically inflating and deflating when activated, it provides continuous slight movement to the lower back thus relieving the strain and fatigue caused by sitting in one position for an extended period of time. Loaded with additional comfort and support adjustments and a larger cushion than our top selling National Seating 2000 platform, the HP seat delivers to you a true king of the road ride to help you make those long hauls. More comfort. Less Pain. More Uptime.

40019.654B Tan Installed - \$1,000.00

Commodore Series Seats: Keeping the rig moving is how your job gets done. The longer you can keep moving the better the return. Comfort is one of the most critical factors to keeping the load rolling. The Commodore helps ensure you get maximum uptime by helping to reduce the pain and strain which leads to increased downtime.

On the surface you can see the larger size of the Commodore versus other seats, but that is just the surface. The real keys to your comfort are our exclusive BackCycler system and HP air suspension. Along with the ergonomic design and multitude of adjustments to get the right support and fit, the Commodore is the real solution to ensuring your comfort so you can keep moving. Looking for even more, then take a step up to the Admiral series.
